

PROFESSIONAL SUMMARY

Cybersecurity undergraduate with hands-on experience in Linux system administration, command-line troubleshooting, scripting, and security-focused development. Experienced in building Python-based security tools, demonstrating common web application vulnerabilities, and exploring system misconfigurations in controlled lab environments. Self-taught and adaptable, with a strong interest in web application security, operating system vulnerabilities, and security research. Seeking an entry-level cybersecurity internship or junior position to contribute technical skills while developing practical security expertise.

TECHNICAL SKILLS

Operating Systems	Linux, Windows
Programming & Scripting	Python (Intermediate), Bash (Advanced), PowerShell (Intermediate)
Security Tools	Nmap, Burp Suite, Metasploit, Gobuster, John the Ripper, Hashcat
Cybersecurity	Web application security, vulnerability testing in controlled environments, privilege escalation concepts, security misconfiguration analysis, password auditing, and basic security assessment methodology
Web Technologies	Flask, SQLite, Jinja2, bcrypt, REST APIs
Development & Infrastructure	Git, GitHub, Docker, Virtual Machines, Home Lab Environments
Networking	TCP/IP, DNS, HTTP/HTTPS, subnetting, routing, switching, firewalls, VPNs, and network troubleshooting

PROJECTS

1. OWASP Flask Demo

Technologies: Python, Flask, SQLite, Jinja2, bcrypt, Flask-WTF
GitHub: github.com/nayush-ghimire/OWSAP-flask-demo

- Developed a hands-on web application security demonstration featuring vulnerable and secure Flask applications.
- Implemented six vulnerability demonstrations: SQL Injection, Stored Cross-Site Scripting (XSS), Insecure Direct Object References (IDOR), plaintext password storage, broken authentication, and Cross-Site Request Forgery (CSRF).
- Demonstrated corresponding security mitigations, including bcrypt password hashing, CSRF protection, and access control.
- Created technical write-ups and reproducible demonstrations explaining vulnerabilities and their remediation.

2. Password Audit Tool

Technologies: Python, SHA-1, Have I Been Pwned API, pytest
GitHub: github.com/nayush-ghimire/Password-Audit-Tool

- Developed a modular, privacy-focused password auditing tool that evaluates password strength using entropy-based analysis.
- Implemented pattern detection for keyboard walks, repeated characters, sequential patterns, and common password variations.
- Integrated the Have I Been Pwned Pwned Passwords API using the k-anonymity model to check for known password breaches.
- Implemented offline wordlist checks using a database of 10,000 common passwords and a scoring system to categorize password strength.

PRACTICAL CYBERSECURITY EXPERIENCE

Personal Security Home Lab

Environment: Kali Linux, Windows Virtual Machines

- Maintained a personal lab environment using Kali Linux and vulnerable Windows virtual machines for hands-on security learning.
- Practiced vulnerability testing and explored how system misconfigurations can create security weaknesses.
- Studied common exploitation techniques and privilege escalation concepts in controlled environments.

Cybersecurity Community Participation

Event: Hack The Box Community Meetup

- Participated in a Hack The Box community meetup discovered through Meetup.com.
- Engaged with the cybersecurity community and explored practical cybersecurity learning opportunities.

EDUCATION

Bachelor's Degree in Cybersecurity

LBEF College — Affiliated with Asia Pacific University (APU)
Currently pursuing the first semester of a three-year bachelor's program in Cybersecurity.

2026 – Expected 2029

Higher Secondary Education (+2)

Completed Class 12.

TRAINING & PROFESSIONAL DEVELOPMENT

- Hack The Box:** Currently enrolled in the SOC Analyst learning path.
- TryHackMe:** Cybersecurity learning and practical lab platform.
- Self-directed Learning:** Independent study of Linux security, web application vulnerabilities, system misconfigurations, and security testing techniques.

PROFESSIONAL STRENGTHS

- Independent Learning:** Self-taught technical skills and a commitment to continuous learning.
- Adaptability:** Willingness to explore unfamiliar technologies and adapt to new technical challenges.
- Communication:** Comfortable communicating technical ideas and collaborating with others.

LANGUAGES

Nepali	Native
English	Advanced
Hindi	Proficient

AVAILABILITY

Location	Kathmandu, Nepal
Availability	Immediately
Working Hours	Up to 30 hours/week
Preferred Schedule	After 1:00 PM
Work Arrangement	Remote or on-site
